## Projects

### Academic Conference Management

Academic Conference Management refers to the iterative process of developing and refining a model or framework for organizing and executing conferences. This approach allows organizers to visualize, test, and improve various aspects of conference planning before the actual event takes place. Here's an overview of how prototype design can be applied in academic conference management.

### Campus Placement/Recruitment Management System

A Campus Placement/Recruitment Management System is a software platform designed to streamline and automate the recruitment process in educational institutions. It connects students, recruiters, and placement officers in a centralized system for efficient collaboration.
